CHATGPT POWER COMMANDS

50 ChatGPT Secret Codes

The exact shorthand commands that turn ChatGPT and Codex into a strategic team member, not a toy. Copy them. Use them. Stop starting from a blank prompt.

Added Oct 12, 2026

50 ChatGPT Secret Codes

The exact shorthand commands that turn ChatGPT and Codex into a strategic team member, not a toy. Copy them. Use them. Stop starting from a blank prompt.

1-7 Better Thinking

- **/human** — Get a plain, human-level answer with no jargon.
- **/truth** — Strip the flattery. Get the direct, honest take.
- **/red-team** — Attack your own idea before the market does.
- **/meta** — Step back and think about how you're thinking.
- **/alt-3** — Force three genuinely different alternatives.
- **/ooda** — Run the Observe-Orient-Decide-Act loop on a decision.
- **/socrates** — Get questioned instead of answered, to sharpen your own thinking.

8-12 Codex Control

- **/model** — Switch which model is handling the session.
- **/goal** — Set or restate the objective driving the session.
- **/rename** — Rename the current session for easy tracking.
- **/resume** — Pick a past session back up where you left off.
- **/statusline** — Show a live status line for the current session.

13-22 Business + Communication

- **/10x** — Push an idea to its most ambitious version.
- **/devil** — Argue the opposing case, on purpose.
- **/pitch** — Turn an idea into a tight, persuasive pitch.
- **/ghost** — Write in someone else's voice from samples.

- **/compare** — Lay two or more options side by side.
- **/scout** — Go find and summarize what's out there on a topic.
- **/critique** — Get a structured critique of your work.
- **/eli5** — Explain it like the reader is five.
- **/brief** — Compress the answer to a short executive brief.
- **/teacher** — Walk through it step by step, like a tutor.

23-28 Content + Marketing

- **/brand-brief** — Generate a working brand brief for a project.
- **/content-coach** — Get coaching feedback on a piece of content.
- **/post-grader** — Grade a social post before you publish it.
- **/post-writer** — Draft a full social post from a raw idea.
- **/repurpose** — Turn one piece of content into several formats.
- **/viral-hooks** — Generate a batch of scroll-stopping hooks.

29 Research

- **/Deepresearch** — Trigger a deep, multi-source research pass on a topic.

30-50 Codex Power User Commands

- **/init** — Initialize a new project or session.
- **/status** — Check current session or project status.
- **/plan** — Generate a working plan before execution.
- **/review** — Run a review pass on the current work.
- **/diff** — Show what's changed since the last version.
- **/compact** — Compress session history to save space.
- **/new** — Start a fresh session.
- **/fork** — Branch off the current session into a new path.
- **/permissions** — Review or adjust what the session can access.
- **/skills** — List or manage available skills.
- **/memories** — View or manage stored session memory.
- **/side** — Open a side task without losing the main thread.

- **/btw** — Drop in a quick aside without derailing the session.
- **/reasoning** — Adjust or reveal the reasoning depth being used.
- **/fast** — Prioritize speed over depth for this task.
- **/project** — Switch context to a specific project.
- **/worktree** — Work across a specific code worktree.
- **/cloud** — Run the session in the cloud environment.
- **/local** — Run the session in the local environment.
- **/mcp** — Connect or manage an MCP server for this session.
- **/feedback** — Send feedback on the current session or tool.
